Bilateral Meetings

- Monday 02:00 pm - 05:00 pm

Description

Based in Ljubljana, Slovenia, and active in several international markets, Ascaldera is a go-to name for sophisticated and efficient digital business solutions, consulting and development. Since its foundation in 2011, the company has grown into a team of more than 20 experts on business process optimization, cyber security, secure infrastructure, and data protection. Ascaldera was an authority in the field of GDPR several years before it became an urgent topic. Even more, the company provides corporations and SMEs with its own line of products and services for extremely secure, time-saving data backup solutions - 2CriptTM. The characteristics of the firm - namely, its wide array of expertise, its flexibility, as well as capability for a quick response to the digital business dynamics - are all directed to the R&D department, which frequently supplies its customers with most advanced solutions, developed on blockchain and other emerging technologies.
